SUMMER
**IS THE NEW
HORIZON**

WHITE SNOW HAS GIVEN WAY TO GREEN GRASS

Snowy slopes have melted into hiking trails. The mountain now reveals its southern slope. Rossignol has gone all summery too! **Head for new territories and new seasons.**

In line with its hundred-year-old heritage, Rossignol continues its unique dialogue with the mountains and alpine culture, but in the full sun this time.

Faithful to Rossignol's historic expertise with winter sports, this new footwear outdoor line is part of its tradition of innovating and technicity. **Whether you're up in the heights or strolling around the city, everything has been designed so that you can get the most out of the fresh alpine air.**

The weather may be sunnier, but the spirit remains the same, an ethos that is more than ever all about living in touch with nature.

POSSIGNOR

TECHNOLOGIES

SENSOR 3 SYSTEM

Concept developed by the Rossignol Group to improve foot support and comfort. The Sensor 3 technology is a footbed of variable densities. 3 zones of increased shock absorption help support the foot. This transfers to a gain in energy and increased comfort during use.

WATERPROOF MEMBRANE WR/TEX

WR/TEX membrane creates a waterproof and breathable barrier to keep feet dry.

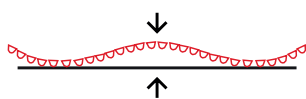

DURABLE WATER REPELLENT TREATMENT

The DWR (Durable Water Repellent) treatment allows water to drip along the clothing without entering inside.

EXCELLENT GRIP

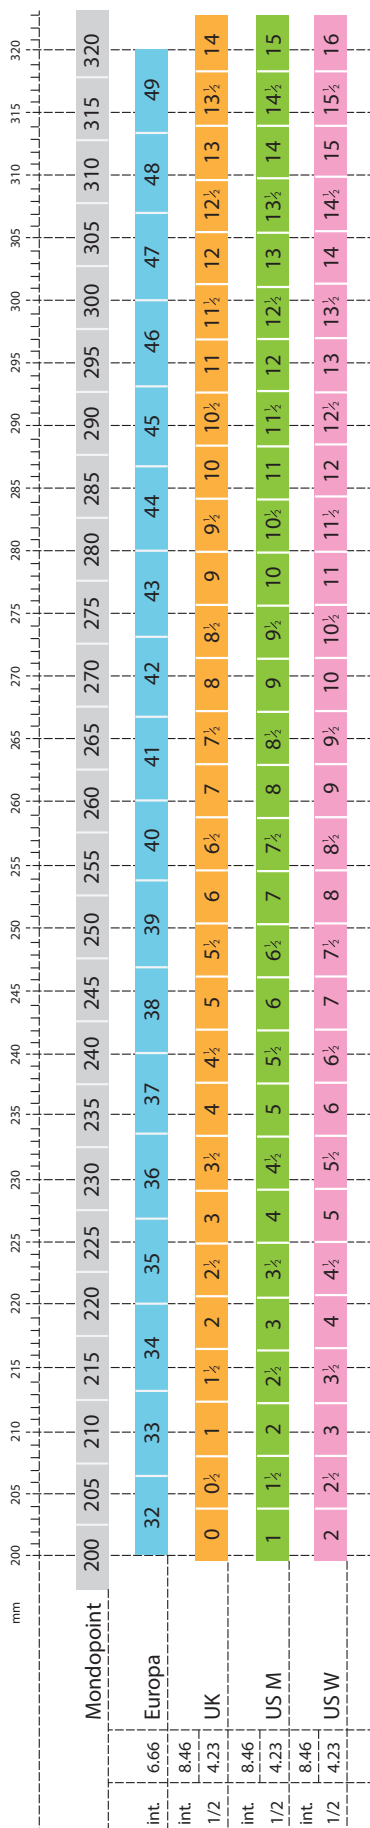

The rubber sole allows a good apprehension of the grounds and a perfect grip on all terrains.

HIGHLY COMFORTABLE DROP

Drop is defined as the differential between the forefoot and the heel. The increase and / or decrease of this value (expressed in mm) change the posture of the runner. Drop 8 is the height that positions the body's posture in an appropriate position between comfort and performance, both for running and walking.
